「アジアのトップ大学 ー私の経験ー」

My Top Asian University Experiences

Higher education has profoundly changed in the past two decades. To address the challenges imposed by modern technology and demography, academic institutions worldwide need to reconsider their educational and social roles. What have others do to respond to these opportunities?

I will share my observations from top universities in Hong Kong and Taiwan in this talk, with a demonstration of how to engage students in a community project to promote the literature of Brain Science.
